### **FIRE FIGHTER CANCER FOUNDATION UFUA CONTINUES TO CAMPAIGN FOR JUSTICE FOR FIREFIGHTERS WITH OCCUPATIONAL CANCER**

---

As part of the UFUA continued campaign to advocate and campaign for justice for firefighters with occupational cancer, the UFUA has established the Fire Fighter Cancer Foundation and registered trademarks. The Fire Fighter Cancer Foundation was launched on the UFUA website and social media through Face Book yesterday.

The UFUA's "Fire Fighter Cancer Foundation" Face Book page has already had tremendous support within 12 hours of going live including supporters adopting the logo as their Face Book profile picture. Go to <https://www.facebook.com/firefighter.cancer.foundation> to visit and like the Face Book page.

This project is part of the overall campaign to have occupational cancer and firefighting recognised so that all Australian firefighters can access their entitlements including medical assistance and compensation. To date the Australian Parliament, and the Tasmanian, South Australian and Western Australian state governments have all introduced presumptive legislation recognising the same 12 occupational cancers. This is an ongoing campaign to have all Australian firefighters, regardless of state or territory, to have the protections of presumptive legislation. The UFUA's Fire Fighter Cancer Foundation will assist with that ongoing campaign.

If you would like to donate or support this Foundation please contact the national office at [ufunational@ufunat.asn.au](mailto:ufunational@ufunat.asn.au) for details.
